2018 TILE MARBLE TERRAZZO SEMINAR SERIES

featuring Contractor College

The seminars

Tile seminar *sponsored by Schluter Systems*

Ceramic and stone tiles are beautiful and durable surface coverings, but today's construction environment presents a variety of unique installation challenges. Our discussion will include tile membrane advancements, sound control for tiled floors, movement accommodation, controversial issues such as mold and questionable shower assemblies and tile trim profiles that not only provide edge protection but enhance the aesthetic appeal of your design. TCNA Handbook details will be discussed. **1.0 AIA HSW; 1.0 IDCEC**

Stone Seminar *sponsored by Daltilo*

This seminar is an introductory course on stone cladding technologies. It is designed to give an overview on all concepts associated with natural stone cladding including stone sourcing, stone selection, stone testing, anchoring systems and installation requirements. The program will teach participants the basic types of anchoring systems; it will discuss some limitations in selecting and sourcing stone; it will address proper testing procedures and results for stone selection; and it will present case studies of stone cladding projects.

1.0 AIA HSW; 1.0 GBCI

Terrazzo seminar

sponsored by National Terrazzo & Mosaic Association

Focusing primarily on epoxy terrazzo systems, this presentation reviews the basic characteristics of terrazzo surfaces with a primary emphasis on its sustainable benefits. It analyzes the components and details of the system, from substrate preparation, primers and membranes, strips, chips, and binders. It also looks at performance and cost criteria, as well as design possibilities for each system. The program will also discuss how to maximize terrazzo's sustainable design benefits. **1.0 AIA HSW**

Resinous Flooring seminar

sponsored by Terrazzo & Marble Supply Co.

Seamless floor systems are ideal for both industrial and decorative applications. This seminar focuses on seamless flooring systems from thin film to troweled down, recommended applications, and the benefits of the respective systems. The program will also discuss proper surface preparation and the critical skills required of the installers. **1.0 AIA**
